SUMMARY

Full-Stack Developer proficient in building practical, scalable web applications with experience in both frontend and backend technologies.

PROJECTS

PeakPrep: Scalable web platform connecting students, recruiters, and the Training & Placement department to streamline campus hiring, resume building, interview preparation, and application tracking. Built using Node.js, React, MongoDB, and integrated AI-driven features for personalized feedback and analytics. Worked as a Full-Stack Developer in a team of 4, overseeing both frontend and backend development while ensuring seamless integration across the stack.

- Developed a centralized platform enabling HRs to manage job applications and students to track their application status.
- Built a dynamic resume builder and coding contests module to simulate real-world interview scenarios.
- Designed and implemented personalized feedback systems, improving student progress tracking and HR engagement.
- Integrated AI-powered features for enhanced user experience, leveraging Node.js, React, and MongoDB.

AI Traffic System: Collaborated in a team of 4 to develop an AI-powered traffic management system that optimizes intersection traffic flow using real-time vehicle and pedestrian detection.

- Integrated Azure Custom Vision for precise object detection, improving traffic signal control in real time.
- Developed a machine learning model for dynamic signal timing based on vehicle/pedestrian density, reducing congestion.
- Implemented accident detection and alert system, enhancing safety and emergency response.

2-Tier-Application-Deployment: Built a cloud-native two-tier application deployment platform for automated provisioning and management of scalable web services.

- Automated deployment of a two-tier architecture on AWS using EC2 instances and VPC for secure network segmentation.
- Containerized frontend and backend applications with Docker, enabling consistent and portable deployments across environments.
- Provisioned and managed infrastructure with Terraform, streamlining resource creation, configuration, and scalability in the cloud.

SKILLS

Programming Languages	Java, C, TypeScript
Development	React.js, Node.js, Express.js, MongoDB, REST APIs
Cloud & Devops	AWS, Docker, Terraform, Git, Bash Scripting
Core CS Concepts	Object Oriented Programming, Data Structures & Algorithms
Soft Skills	Problem-Solving, Communication, Teamwork, Adaptability

EDUCATION

Bachelor’s Degree in Computer Science & Engineering, Siksha ‘O’ Anusandhan	2022 - 2026
GPA: 9.25	
Secondary and Senior Secondary Education, JNV Khordha	2015 - 2022

CERTIFICATIONS & ACHIEVEMENTS

- Complete Full-Stack Web Development Bootcamp - [Udemy](#) 2024
- Ranked in the **Top 15%** globally in [LeetCode](#) Contest Ratings 2025
